## Security Systems - Since 2003

### Security SIM for GSM Alarms, Lone Worker Alarms and GSM Diallers

- Break out your SIM carefully. Most GSM devices use a **large** size SIM.
- Voicemail and SIM PIN have already been **disabled** for use in your device.
- Help! if you have a problem with your security SIM email: [help@securitysims.co.uk](mailto:help@securitysims.co.uk)

#### Please Link your mobile and /or email address to this SIM card as soon as possible.

Your Security SIM requires to be linked to 1 Administrator mobile phone number. To link your security SIM to your mobile phone please visit <http://www.quicksafe.co.uk/link.htm> .

You will need the SIM card holder as we validate the linking process using the 4 digit **Code** on the SIM card holder to the right of the barcode.

Once linked you can send credit balance SMS Text requests to **447430614416**. This telecom number verifies your mobile is linked with your Security SIM and replies to credit balance request.

**BAL 0044(your security SIM number) - Example: BAL 00447123456789**

After a balance request in the format above have been sent to **447430614416** using your linked mobile phone you will then receive a text showing your Security SIM balance.

**\*Please note this linking process is only for SIM Card Low Credit warnings and SIM card administration. This linking process has no part in operating your device. Please consult with your products technical helpline for operating the actual device.**

#### Important! Use 0044 not 0 prefix.

To provide the best coverage our SIM cards roam over all available networks. Therefore, always use the **0044** prefix on all mobile telephone numbers stored as contact numbers and when contacting your security SIM card. For example instead of 07123456789 use **00447123456789**.

#### Top up your SIM Card.

Security SIM Cards are preloaded with £10 of credit to get you started. To ensure your device remains active and in credit you can top up at your security SIM online at:

<http://quicksafe.easypayg.com/index.php>

<http://www.quicksafe.co.uk/security-sim-cards.htm>

**We strongly advise that you top up your alarm SIM card soon to ensure credit remains high after alarm testing.**

#### APN Settings

If your device uses the internet, Data or email you require a APN setting for your security SIM.

The APN is: **mobiledata**

no username or password is required.

**Help! If you have a problem with your security SIM email [help@securitysims.co.uk](mailto:help@securitysims.co.uk)**
