Examples of Text Alerts After Alarm Phone Call.

Easy to use:

After a fall or press of the panic button the lone worker is played a confirmation message.

If the user does not cancel the alarm with a button press each contact number is called twice until the call is answered.

Two way speech is then open. Also each mobile phone contact is sent an alarm text alert.

The GPS location of the lone worker is also sent to mobile phone contacts who can then summon help to the lone workers location.
